

## Patented foam construction with superior resilience

Tested to ASTM D4060  
Example shows **minimal** wear after 2000 cycles on Taber Abrador.

*Zed Land's patented high molecular density foam provides continued resilience, which induces natural muscle flexing and thus reduces standing fatigue. This high quality foam has wear properties that excel other products. The "bounce"*

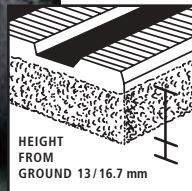

*properties are equally long lasting providing a standing surface that will not deaden.*

*Zed Land is available in a range of mat sizes and roll lengths to suit all areas. Available in 2 standard colours of Dark Grey and Blue.*

- **Excellent fatigue reduction.**
- **ASTM D4060 - minimal wear.**
- **Patented foam construction.**
- **Long lasting and does not deaden.**

## Zed Land base mat with heavy duty ribbed surface

*Zed Tred has been designed and constructed utilising two of industry's outstanding and durable products - hardwearing Flexi Tred matting now available with patented Zed Land (see above) thermally fused to its base. This exceptional*

*combination provides a heavy duty, slip resistant ribbed surface that is cushioned to give a resilient 'bounce' underfoot. The fused construction means Zed Tred will never separate or delaminate.*

- **Excellent wear resistance.**
- **Good slip resistance.**
- **Fused construction that never delaminates.**

*Available with a choice of foam base thicknesses, either 9mm or 12.7mm (Flexi Tred wear surface adding a further 4mm).*
